

Reimbursement Guidelines

WebExercises Rehabilitation System™ provides patients a unique combination of handouts and personalized online exercise prescriptions, complete with streaming video. This system makes the process of instruction, preparation and review of appropriate materials with your patients suitable for reimbursement and can be classified in different ways.

- **Therapeutic:** CPT codes for therapeutic exercise (97110), neuromuscular re-education (97112) and therapeutic activity (97530) are covered in the provision of home program instructions by individuals licensed by a particular state to perform such services.
- **Educational:** Supplies and materials provided by the health care practitioner over and above those usually included with the office visit or other services rendered are reimbursable (CPT code 99070).

Additionally, educational supplies, such as books, videos, tapes and pamphlets provided by the health care practitioner for the patient's education at the cost to the health care practitioner, may also be reimbursed under educational supplies (CPT code 99071). However, the decision to reimburse under this code varies among different insurance companies as well as being dependent upon the individual patient's policy. Use of this code may require that you substantiate your claim with information showing how WebExercises Rehabilitation System™ differs from traditional, paper-based models.

Coding Guideline: The codes listed below are a guideline for you to use based on your clinical expertise. WebExercises Rehabilitation System™ cannot guarantee reimbursement for you or your patient, since reimbursement criteria and policies vary widely from state to state within the United States.

CPT Code	Title	Description
97110	Therapeutic procedure, one or more areas, each 15 min.	Therapeutic exercises to develop strength and endurance, range of motion and flexibility.
97112	Therapeutic procedure, one or more areas, each 15 min.	Neuromuscular re-education of movement, balance, coordination, kinesthetic sense, posture, and proprioception.
97150	Therapeutic procedure(s), group (2 or more individuals).	Therapeutic exercises to develop strength and endurance, range of motion and flexibility for 2 or more individuals.
97530	Therapeutic activities, direct hands-on, each 15 minutes.	Use of dynamic activities to improve functional performance with direct contact by the provider.
Modifier -52	Reduced Services	-52 modifier is used to record a reduced time service. Example: 97530-52 to indicate ten minutes face-to-face instead of 15 minutes.
